

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)
Department of Computer Science and Engineering
CO1 ASSESSMENT TOOL 2 – Agile Sprint Planning & User Story Workshop

Course Code:	CSA10 / CSA1063	Course Title:	Software Engineering
CO Assessed:	CO1	Assessment:	Assessment Tool 2 – Agile Sprint Planning & User Story Workshop
Weightage:	20%	Total Marks:	25
CO1 Statement:	<i>Apply advanced methodologies and agile project management techniques to manage software projects effectively</i>		
Student Name:	Y.Krishna Tejesh Reddy	Reg. No.:	192411200
Date:	31-07-2026	Duration:	60 minutes

Code of Conduct

I _Y.Krishna Tejesh Reddy(192411200)_ (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: _____

1. Identify the Project Vision and Stakeholders

➤ Project Vision

To develop a web-based Campus Placement and Recruitment Management Portal that streamlines the entire campus recruitment process by connecting students, recruiters, and placement officers on a single platform. The system automates key activities such as job postings, student applications, interview scheduling, candidate shortlisting, and recruitment tracking. It provides real-time updates, secure data management, and efficient communication among all stakeholders.

➤ Objectives

- Automate campus recruitment activities.
- Allow students to create professional profiles.
- Enable recruiters to post job openings.
- Manage interview schedules digitally.
- Track placement status in real time.
- Reduce paperwork and manual effort

➤ Stakeholders

Stakeholder	Role
Students	Register, apply for jobs, view results
Recruiters	Post jobs, shortlist candidates, schedule interviews
Placement Officer	Manage companies, students, recruitment drives
College Administration	Monitor placement statistics
System Administrator	Manage users, security, database

Fig 1 : This Diagram highlights how the portal synchronizes every stage of the recruitment process into a single, efficient ecosystem.

2. Create Epics and User Stories

🚩 Epic 1 – Student Management

- User Story 1
 - As a **student**, I want to register my profile so that I can apply for placement drives.
- User Story 2
 - As a **student**, I want to upload my resume so recruiters can view my qualifications.

🚩 Epic 2 – Recruitment Management

- User Story 3
 - As a **recruiter**, I want to post job openings so students can apply.
- User Story 4
 - As a **recruiter**, I want to shortlist candidates so only eligible students attend interviews.

🌈 Epic 3 – Placement Management

- User Story 5
 - As a **placement officer**, I want to schedule interviews so students know their interview timings.
- User Story 6
 - As a **placement officer**, I want to generate placement reports so college management can monitor placements.

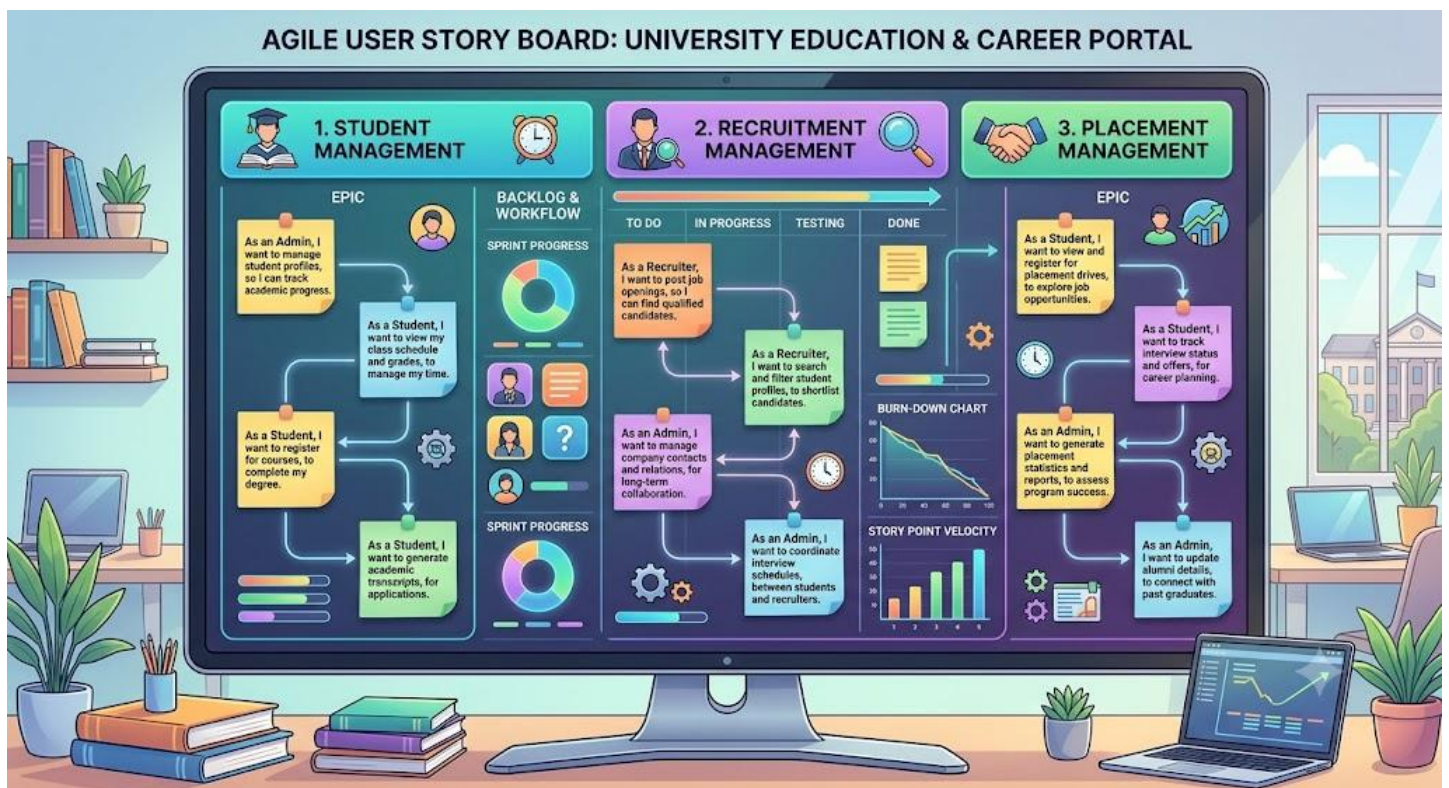

Fig 2 :Work flow of the Recruitment APP

3. Define Acceptance Criteria

- **User Story 1**

- ❖ **Given**

- The student has opened the registration page.

- ❖ **When**

- The student enters valid information and clicks Register.

- ❖ **Then**

- The account should be created successfully.

- **User Story 2**

- ❖ **Given**

- The student is logged in.

- ❖ **When**

- The resume is uploaded.

- ❖ **Then**

- The resume should be visible in the student profile.

- **User Story 3**

- ❖ **Given**

- The recruiter is logged in.

- ❖ **When**

- A new job is created.

- ❖ **Then**

- The job should appear in the job listings.

- **User Story 4**

- ❖ **Given**

- Applications are received.

- ❖ **When**

The recruiter shortlists candidates.

- ❖ **Then**

Selected students should receive notifications.

- **User Story 5**

- ❖ **Given**

Candidates are shortlisted.

- ❖ **When**

Placement officer schedules interviews.

- ❖ **Then**

Interview date and time should be visible to students.

- **User Story 6**

- ❖ **Given**

Placement data is available.

- ❖ **When**

Reports are generated.

- ❖ **Then**

Statistics should be displayed accurately.

4. Prioritize the Product Backlog

Priority	Product Backlog Item	Business Value
High	Student Registration	Very High
High	Login Authentication	Very High
High	Resume Upload	High
High	Job Posting	High
High	Job Application	High
Medium	Candidate Shortlisting	Medium
Medium	Interview Scheduling	Medium
Medium	Email Notifications	Medium
Low	Placement Reports	Low
Low	Dashboard Analytics	Low

5. Plan the Sprint Backlog

➤ Sprint 1 User Stories

- Student Registration
- Login
- Resume Upload
- Recruiter Job Posting

➤ Development Tasks

Student Registration

- Design Registration Page
- Validate Student Data
- Store Data in Database
- Send Confirmation Message

➤ Login Module

- Create Login Form
- Password Encryption
- Authentication

➤ Resume Upload

- Upload PDF
- Save Resume
- Display Resume

➤ Job Posting

- Add Job Form
- Store Job Details
- Publish Jobs

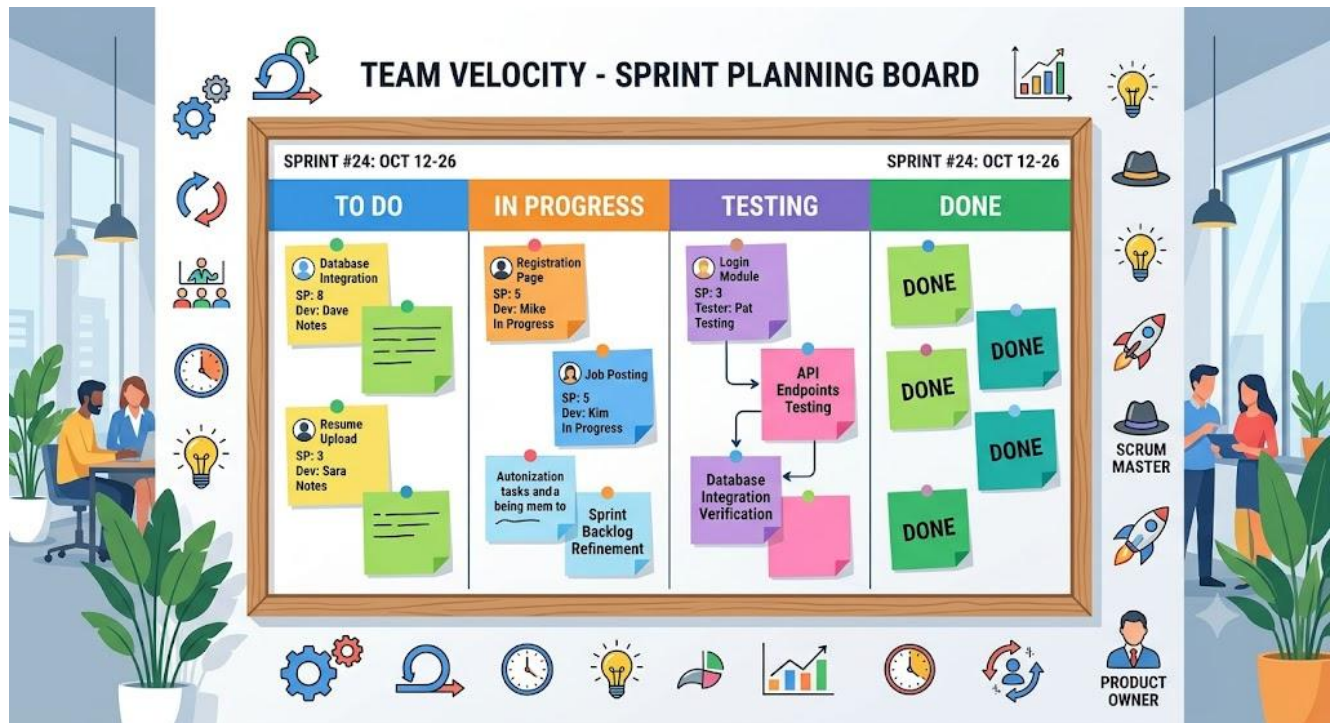

Fig 3 .Sprint Schedule Planning

6. Estimate Effort Using Story Points

User Story	Story Points	Justification
Student Registration	3	Simple form and validation
Login	2	Basic authentication
Resume Upload	5	File handling and storage
Job Posting	5	Database operations
Job Application	8	Multiple validations
Interview Scheduling	8	Calendar integration
Placement Reports	13	Complex reporting

7. Present the Sprint Goal and Expected Deliverables

Sprint Goal

Develop the core functionalities of the Campus Placement and Recruitment Management Portal, enabling student registration, recruiter job posting, resume upload, and secure login.

Expected Deliverables

- Student Registration Module
- Login System
- Resume Upload Feature
- Job Posting Module
- Database Integration
- Basic User Dashboard
- Successful Unit Testing
